OUTPUTS

01

Good Practice Catalogue

The aim of the catalogue is to serve the academic communities in Europe and beyond as a source of information and inspiration, enable exchanges and collaboration between interested parties. The catalogue will also lay ground for the measures generating the other intellectual outputs described below, as it will help to identify both good practice and expertise on issues. While this intellectual output is focussed on refugees, it will also be of interest for a more general discussion on the preparedness of higher education to welcome and include migrants, and regarding the issues of integration strategies and diversity management in general.
